MASSIMO TAMBURINI

SOFTWARE DEVELOPER

I am a developer with experience in sofware development. I am fueled by knowledge, passionate about learning and focusing my energy on growing both as a person and a professional.

I like to find solutions that speed up and increase work quality and I like to create products that can help people's lives.

WORK EXPERIENCES

Software Developer

Botika srl | August 2021 - Today

- Software structure analysis, accessing risks and technlogies
- Evaluating timing and organization of own work using sprints, user stories and tasks
- Building of AWS cloud environments
- Programming software and scripts that can automatically configure, create and deploy software on cloud instances
- Intensive use of automation software (Docker)

Freelancer

August 2019 - December 2021

- Customer relationship and time estimation
- I worked on different products using Flutter, Laravel, Prestashop and Angular. With Flutter I created apps on both Android and iOS and I took care of stores distribution

Junior Software Developer

Alexide Srl | March 2020 - August 2021

- I created a CI using Jenkins and Powershell scripts that could automatically install and configure all the company's products
- I created Docker containers used both within the company and by external customers. This was used as a test environment for the company's applications
- Developed functionalities in C# in the company's internal products

Erasmus Internship in Prague

Beit srl | June - August 2019

- Development on the main web product in Angular
- Development of a web application for the internal management of employees' working hours
- Fluent in both spoken and written in English
